Sky Map Online web app provides free, printable & interactive sky charts for any location, time and viewpoint. It shows the night sky stars up to magnitude 12, planets and DSO.

**Sky Map Online**  
Constellation Map: Constellation maps divide the celestial sphere into 88 parts, known as constellations, helping astronomers locate stars and deep sky objects. The constellations that can be seen in the sky at night depend on the observer's location and season, and they change throughout the year. Out of the 88 constellations recognized by the International Astronomical Union (IAU), 36 are found predominantly in the northern sky, while the remaining 52 are located in the southern sky.

**Constellation Map - Constellation Guide**  
By definition, a celestial map is a key to the stars traditionally used to help astronomers see constellations and galaxies. But these days it's common to find vintage maps or artist replicas framed as home decor.
