Agalychnis callidryas, known as the red-eyed treefrog, is an arboreal hylid native to Neotropical rainforests where it ranges from Mexico, through Central America, to Colombia. It is sometimes kept in captivity. The scientific name of the red-eyed treefrog, *A. callidryas*, comes from Greek words kalos (beautiful) and dryas (a tree or wood nymph).

Agalychnis callidryas - Wikipedia

The Red-eyed Tree Frog is one of eastern Australia's most colourful frogs. Identification Despite its prominent red eyes and bright green back the Red-eyed Tree Frog is less often seen than its relative, the Green Tree Frog (*Litoria caerulea*).

Red-eyed Tree Frog - The Australian Museum

The Red Eye Tree Frog has a very obvious common name – it is a tree frog with bright red eyes! Its scientific name is *Agalychnis callidryas*, which literally translates into (aga) plenty of (lychnos) shining (kallos) beautiful (dryas) tree nymph. This refers to their sparkling eyes, beautiful appearance, and arboreal habits.

How to Care for Red Eye Tree Frogs - Agalychnis callidryas ...

Red-Eyed Tree Frogs are likely the most well-known frogs in the world. Certainly among treefrogs, to say the least. With their big red eyes, orange feet, and bright green skin with blue sides, it's no wonder they're so popular. They make great pets too. I don't recommend them for beginners but they're not extremely difficult to care for either.
